

DELIVERY AND TURNAROUND TIMES

OCEANIC
DENTAL
LABORATORY

Wherever possible we strive to ensure our service is delivered in a timely and efficient manner. However factors beyond our control can influence our ability to do this. If we require further technical information or have problems to discuss with any particular case we may need to adjust expected delivery times. Prescribing dentists being available to discuss laboratory concerns as well as completing the relevant sections on the lab order form will greatly reduce any delays.

As a general rule, please allow a full two weeks between patient appointments. Extra time may be required for implant cases where specific componentry needs to be ordered.

Delivery and handling is included in our service across our range of products.

CROWN AND BRIDGE WORK	TURN AROUND TIMES
